INTRODUCTION

This bibliography is a partial compilation of documents produced or commissioned by State Governments (with a few exceptions) in the areas of land-use management and planning of statewide significance from 1960 to 1974.

Documents referenced take the form of summaries of state land-use control structure, activities and regulations, background and technical papers supporting various elements of a state's management or planning program, goals and policy reports, plans or regulations for the use of critical environmental areas, key facilities or other phenomena of statewide significance, plans for outlining or overcoming a land-related environmental problem (e.g. solid waste, strip mining), requirements of an economic or environmental impact statement, special study or inter-agency commission or council reports (e.g. on growth-associated problems or land-use problems), public-oriented informative reports or proceedings of public workshops on land-use problems, reports or handbooks for the benefit of local government or related conference proceedings.

It may seen odd to some at first glance that I have included such a wide range of topic headings, all under the auspices of land-use management and planning. Upon closer examination I think it can be seen that all of those topics are directly (or indirectly) vitally important to the way land is used. Because they are, they were included here.

Two sources made major inputs to this bibliography. The City Planning Library of the University of Illinois and the Monthly Checklist of State Publications by the Library of Congress provided the bulk of the references.

In addition, a survey of 200 state agencies across the country provided the bibliography with the most recent publications available. Without the kind cooperation of these contributing agencies, this bibliography would have been much more incomplete.

It is hoped that this bibliography will be a working bibliography for basic research into what the states are accomplishing in the land-use management field. As always, additions are welcomed as an attempt to promote a freer exchange of information in this area of current interest.

DESCRIPTION OF TOPIC HEADING CONTENTS

1. States Look at the Future with Policy and Goal Development

   This topic contains relevant materials on the subjects of goal and policy formulation, reports on state goals and policy and materials exploring the future of the state.

2. State Planning

   a) Issues in General State Planning

      This topic is structured to handle the general planning subjects such as: property taxation, program structure and content, attitudes toward planning and planning resources within the state.

   b) Issues in Land Resource Planning

      This contains all materials on state land-use planning including study commission reports, descriptions of the use of land within a state and other matters specifically pertaining to state land-use planning.

3. State Economic Planning

   This is a very broad topic area including materials on economic development planning and development in the sense of urban renewal.

4. Growth as an Issue

   This topic deals with materials analyzing growth within the state and its potential impact and plans and policies to deal with growth.

5. Planning with and for the Environment

   Environmental factors and land-use planning and general environmental planning are the subjects of the studies in this topic area.

6. Recreational Resources

   Recreational planning, implementation plans for recreational programs and analysis and background studies of state recreational resources are included here.

7. Housing

a) General Housing Resources

This topic includes state studies on the condition, problems and renewal of housing within the state (other than mobile homes).

b) Mobile Home Resources

This specific topic area includes the studies done by states on mobile homes.

8. Transportation Planning

a) General Transportation Resources

This contains all materials in the general transportation field including plans, background studies and general transportation concerns.

b) Airport Planning

This topic includes all studies in the specific area of air transportation.

c) Highway Planning

This topic includes all materials in the specific area of highway transportation (plans, analysis).

d) Mass Transit Planning

This includes materials in the specific area of mass transit, i.e. public transit, rail transportation.

e) Waterborne Transportation Planning

Studies analyzing or planning for a state's waterways or ports are included here.

9. Issues in Demographic Change

This topic includes materials on population projections, the impact of population growth and state population policies.

10. Issues in Regional Planning

Regional planning processes, enabling legislation, plans and materials on regional jurisdiction are included here.

11. Local Planning

a) Issues in Local Planning

This is a broad topic area including references to local planning handbooks on practice and procedure and local planning problem areas (other than legal analysis).

b) Local Planning Enabling Acts

This topic includes enabling acts, model regulations and studies discussing the legalities of local planning.

12. Information Systems and Inventories

References for state information system programs and inventory techniques are included here.

13. Project Notification and Review System Guides:

a) Federal Program

This topic includes references to handbooks on A-95 procedures published by the states.

b) State Programs

Handbooks on procedure and background materials on state-run environmental impact statement programs are included here.

14. Natural Resources Conservation, Development and Management

This is a very broad topic area covering materials on natural resource conservation, development and management.

15. "Critical Areas"

a) Environmentally Critical Areas

This topic includes materials on state research, planning and regulation of areas of concern to the state because of a unique, fragile or hazardous environmental character.

b) Areas of Statewide Concern

Materials on state research, planning and regulation of areas of concern to the state (other than environmental) are referenced here.

16. Geologic Concerns

a) Geologic Resources

This topic includes general reports on state geologic structure and analysis of geologic resources including geologic hazards (other than earthquakes).

b) Earthquake Hazard

This topic covers reports on the very specific areas of seismic dangers.

17. Coastal Area Management

a) Issues in Coastal Area Management

This is a broad topic including materials on shoreline and coastal zone management.

b) Issues in Off-Shore Development

This topic references reports on off-shore mineral and oil recovery, the construction of terminals and similar subjects.

18. Wetland Management

All materials that cover the regulation and planning of inland wetlands are included here.

19. Land Preservation

a) Issues in Land Preservation

This topic is intended to include materials on the general topic of land preservation.

b) Agricultural Land Preservation

Materials on the specific topic are included here.

c) Open Land Preservation

This topic includes plans and background studies dealing with open land.

d) Wildland Preservation

This topic is intended to cover materials on wildlife and wilderness area preservation.

20. Flood Plain Management

Studies discussing flood plain management plans, flood magnitudes and the flood problem are included here.

21. Wildlife Resources

This topic includes studies of a state's wildlife resources (general studies).

22. Agricultural Resources

Materials on a state's agriculture industry are included here.

23. Forest Resources

This topic includes references to materials on a state's forests.

24. Aesthetic Concerns:

a) Issues in Visual Resources

This is a broad topic area that includes roadside visual problems (billboards, junkyards, litter) and beautification programs in general.

b) Wild & Scenic Rivers

This topic includes state plans and background reports on wild and scenic river programs.

c) Historical Preservation

Materials discussing the preservation of historical sites is included here.

25. Water Resources

a) Issues in Water Resources Planning

This topic includes studies in water resource management, problems and planning.

b) Quality of Water Resources

This topic covers aspects of water pollution; the sources and methods of control.

26. Issues in Public Land Management

Materials in this topic area include inventories of public land, public land-use studies and general policy discussions dealing with public land.

27. Energy Resources

a) Issues in Energy Resources

This topic includes reports of energy use, energy resource capabilities and planning and energy problems (except nuclear).

b) Nuclear Power Resources

Studies here include general reports on nuclear power, the hazards of nuclear power and nuclear power plant regulation.

28. Air Resources

This topic covers air pollution; its causes and remedies.

29. Power Plant Siting

Subjects included here are regulation procedures and plans.

30. Siting of other Utilities

Materials here deal with the regulation and development of water and sewer lines and utilities (other than power generation).

31. Issues in New Community (New Town) Development

This topic addresses itself to new town development and policy considerations.

32. Issues in Surface Mining

This topic deals with strip mining problems and regulation.

33. Issues in Acoustics Quality

This topic covers noise pollution; its causes and regulation.

34. Solid Waste Management

a) Issues in Solid Waste Management

Studies in solid waste problems of all types are included here.

b) Solid Waste Management Planning

This topic includes studies on solid waste planning at the state-level and guidelines for planning at less than state-level.

35. Soil Conservation

a) Issues in Soil Conservation

Materials included here discuss soil conservation needs, soil properties and soils in general (except erosion).

b) Soil Erosion Control

This is a specific topic dealing with state reports on soil erosion regulation with background studies.

36. Issues in Environmental Quality

This is the broadest topic addressing itself to general environmental problems and regulation as-well-as environmental problems such as pesticides and detergents that are not treated with any regularity throughtout the 50 states.
